

Plane Sense

Door Prizes and FREE Food. The Federal Aviation Regulations require that an aircraft is "Airworthy" before a pilot can legally fly it! But do you know the definition of the term airworthy? How can a pilot be assured the aircraft meets this requirement? What inspections are required? How can you determine that they have been accomplished? What about ADs, STCs, TCs, 337 Forms and inoperative equipment? Attend this informative meeting and find out!

Directions: Airport College Campus, LCC Aviation Extension.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
